Why is it that whenever there a company's research develops a marketing advantage to further their business position, the government thinks it has the right to stop it?!?!?! I went to XM (and PAY for it) to get away from the antique and archeic media personalities we have become besieged with. I enjoy the variety, consistency, and quality of the XM broadcasts. And now that we have instant weather and traffic, it is complete!!! Tell the commercial AM/FM broadcasters that if they can't stant the heat, get the hell out of the kitchen!!!! Stop legislating away something, just because a minority are screaming foul because of their own inadequacies!!!
